

## Go Fishing at Kentucky Dam Village State Resort Park

Kentucky Dam Village State Resort Park is located at the northern end of one of Kentucky's greatest fishing areas, Kentucky Lake. Kentucky Lake borders the park, where anglers can access some of the best fishing anywhere for largemouth bass, smallmouth bass, black and white crappie, channel catfish, and blue catfish. Fishing is also good for white bass, spotted (Kentucky) bass, bluegill, redear sunfish, and sauger.

By launching a boat from the Kentucky Dam Marina boat ramp, you will be a short distance from fishing many embayments such as Sledd Creek, Little and Big Bear creeks, and Pisgah Bay. Across the lake, anglers will find quick access to Lake Barkley through the adjoining canal. In the canal, anglers will experience good fishing for catfish and white bass, while Lake Barkley offers much of the same great fishing found at Kentucky Lake.

Just a few miles from Kentucky Dam Village State Resort Park, you can launch a boat to fish the Lower Tennessee River below Kentucky Lake Dam or fish along the shoreline. Here you will find great fishing for blue catfish, striped bass, white bass, sauger and numerous sunfish species. In a few years, new fishing piers and shoreline walkways will be available for anglers to enjoy fishing from the shore.
